XXI Century Challenges for Stellar Evolution

Cefalu - 29 August, 2 Septembre, 2007

editors: Santi Cassisi and Maurizio Salaris

TABLE OF CONTENTS

Horizontal Branch stars

The bright, cool side of the CMD

Variable stars

Chemical abundances, constraints on stellar models

The faint end of the CMD

Non-standard physical processes

Exotic objects

Asteroseismology as diagnostic of stellar interiors and calibration of stellar models

Beyond 1D theoretical models

Poster contributions
