MEMORIE DELLA SOCIETÀ ASTRONOMICA ITALIANA

Vol.79 n.3 2008

1st Workshop on science and technology through Long Duration Balloons

Rome, June 03-04, 2008

editors: Silvia Masi, Steven Peterzen, Pietro Ubertini and Sergio Di Cosimo

TABLE OF CONTENTS

Foreword 776

List of participants 778

P. Ubertini
Scientic balloons: historical remarks 783

S. Peterzen et al.
Long Duration Balloon flights development Italian Space Agency 792

P. de Bernardis et al.
From BOOMERanG to B-B-Pol 799

F. Frontera et al.
A gamma-ray Laue lens focusing telescope aboard a balloon experiment 807

M. Bizzarri and A. Cucina
Biological effects of cosmic radiation during stratospheric flights 812

B. Bertucci
The S.E.R.M.S. Laboratory a research and test facility for space payloads and instrumentation 818

P. Picozza and L. Marcelli
Antimatter and dark matter: lessons from ballooning 823

P. S. Marrocchesi
Polar balloon flights with a scaled version of CALET 829

R. Battiston and S. Schael
Proposal for a German - Italian research program to measure charged cosmic rays with Long Duration Balloons 834

R. Palumbo et al.
Meteorological conditions forecast and balloon trajectory estimations 841

P. Di Carlo and G. Visconti
Climatic change and atmospheric composition research via balloons 846

G. Visconti
Airborne measurements and climatic change science: aircraft, balloons and UAV,s 849

P. Palumbo et al.
DUSTER aerosol collection in the stratosphere 853

L. Palchetti et al.
The REFIR-PAD experiment 858

G. Russo et al.
USV: Unmanned Space Vehicle 863

E. Quadrini and E. Caroli
CZT detector technological development and balloon testing 867

L. Natalucci et al.
Background information and technological tests of hard X-ray detectors 872

Nati L. et al.
Cryogenic systems for Long Duration Balloon experiments 878

M. Alderighi et al.
Long Duration Balloon flights for the evaluation of radiation effects on electronic systems 883

S. Masi et al.
OLIMPO 887

G.B. Palmerini et al.
MEMS based inertial navigation systems onboard balloons 893

V. Iafolla et al.
GReAT (General Relativity Accuracy Test): a free fall test of Weak Equivalence Principle from stratospheric balloon altitude 898

M. Salatino et al.
Measuring polarization of interstellar dust: a modulator for the PILOT experiment 905

E. S. Battistelli et al.
Transition Edge Sensors for Long Duration Balloon experiments 910

A. Cardillo et al.
Analysis and prediction of stratospheric balloons trajectories 915

D. Spoto et al.
The Italian balloon launch facility and its role in the frame of ASI stratospheric activities 920

E. Ronchi et al.
STRADIUM: a Telemetry&Telecommand system for LDB flights 926

E. Cianca et al.
EHF channel sounding for telecommunications applications via HAPs and balloons 932

G. Romeo et al.
PEGASO. Polar Explorer for Geomagnetic And other Scientific Observation 940

A. Boscaleri et al.
STRATOBUS: a multiuser platform system for making access to LDB flight easier and cheaper 946

Calvo et al.
Microwave Kinetic Inductance Detectors for Long Duration Balloon experiments 953

F. Nati
Optical sensors for attitude control systems on balloons 958

A. Donati et al.
Hardware, integration & support for the ASI BIRBA balloon campaigns since year 2000 962

L. Merico
Launch opportunities for transmediterranean, transatlantic and local flights from Trapani-Milo base due to meteo conditions 966

L. Verde et al.
Studying reionization with secondary CMB anisotropies 969

E. Flamini and S. Pirrotta
Solar System exploration and SORA 972

S. Masi, S. Peterzen, P. Ubertini
Summary of the final discussion and conclusions of the workshop 978
