MEMORIE DELLA SOCIETÀ ASTRONOMICA ITALIANA
Vol.80 n.1 2009

52^{nd} Meeting of the Italian Astronomical Society

Teramo, May 04-08, 2008

editors: M. Cantiello, S. Cristallo, G. Di Rico, A. Pietrinferni, G. Raimondo

TABLE OF CONTENTS

M. Cantiello, S. Cristallo, G. Di Rico, A. Pietrinferni, G. Raimondo
Foreword 12

List of Participants 14

Session I: Geometry and fundamental nature of the Universe

L. Amendola, M. Kunz and D. Sapone
The dark side of gravity 22

R. Salvaterra, C. Burigana, R. Schneider, T. R. Choudhury, A. Ferrara and L. A. Popa
Cosmic radiative feedback from reionization 26

L. Guzzo
Understanding cosmic acceleration with galaxy redshift surveys 30

M. Gai, M. G. Lattanzi, S. Ligori, D. Loreggia and A. Vecchiato
Gamma Astrometric Measurement Experiment 36

Session II: The formation and the Evolution of the Structure in the Universe

M. Cantiello, G. Raimondo, E. Brocato and I. Biscardi
Distances and stellar population properties using the SBF method 40

P. Span, F. M. Zerbi, P. Santin, R. Pallavicini, V. De Caprio, M. Riva, M. Tintori, P. Di Marcantonio, A. Zacchei, E. Molinari, A. Riva, R. Cosentino, P. Bruno, H. Dekker and S. D'Odorico
X-SHOOTER: a unique opportunity for the Italian community 44

I. Biscardi, G. Raimondo, M. Cantiello and E. Brocato
Optical SBFs of shell galaxies 48

P. Miocchi and R. Capuzzo-Dolcetta
Simulations of nuclear cluster formation 50

A. Martocchia and V. F. Polcaro
SN185 and its proposed remnants 52

Session III: The birth of stars in the Nearby and in the far Universe

D. Galli
The impact of magnetic fields on star formation 54

T. Giannini, L. Calzoletti and B. Nisini
Near-infrared, IFU spectroscopy of the molecular gas in HH99B 59

F. Faustini, S. Molinari, L. Testi and J. Brand
Properties of young cluster in star forming regions 63

L. Spezzi, J. M. Alcal, N. Chapman, E. Covino, N. J. Evans II, A. Frasca, D. Gandolfi, T. L. Huard, I. Oliveira, J. K. Jrgensen, B. Mern and K. R. Stapelfeldt
Infrared and optical studies of the ChamaeleonII and Lupus low-mass star forming regions 67

L. Spezzi, I. Pagano, E. Distefano, S. Messina, N. Siegler and E. Young
A deep optical survey of IC2391 71

A. Calamida, G. Bono, C. E. Corsi, P. B. Stetson, P. G. Prada Moroni, S. Degl'Innocenti, E. Marchetti, P. Amico, I. Ferraro, G. Iannicola, M. Monelli, R. Buonanno, F. Caputo, M. Dall'Ora, L. M. Freyhammer, D. nKoester, M. Nonino, A. M. Piersimoni, L. Pulone and M. Romaniello
Deep and accurate Near-Infrared photometry of the Galactic globular cluster Omega Cen 73

K. Biazzo, A. Frasca, E. Marilli, E. Covino, J. M. Alcal, and O. Cakirli
Magnetic activity in the young star SAO 51891 75

T. Giannini, D. Lorenzetti, M. De Luca, D. Elia, F. Strafella and F. Massi
Spitzer-MIPS survey of the young stellar content in the Vela Molecular Cloud-D 77

N. Sanna, G. Bono, M. Monelli, I. Drozdovsky, G. Giuffrida, S. Cassisi, A. Pietrinferni, P. B. Stetson, R. Buonanno, F. Caputo, C. E. Corsi, I. Ferraro, G. Iannicola, L. Pulone
Stellar populations in the Local Group starburst galaxy IC10 79

A. Di Cecco, G. Bono, M. Monelli, A. Calamida, M. Nonino, P. B. Stetson, R. Buonanno, F. Caputo, C. E. Corsi, I. Ferraro, G. Iannicola, L. Pulone and A. R. Walker
Star count ratios in the Galactic Globular Cluster M92 81

Session IV: The history of the Galaxy and of Nearby galaxies

F. Matteucci
The chemical evolution of the Milky Way and dwarf speroidals of the Local Group 83

A. Mucciarelli
The Globular Clusters of the Large Magellanic Cloud: chemical abundances and ages 89

M. Gennaro, P. G. Prada Moroni and S. Degl'Innocenti
Galactic helium-to-metals enrichment ratio from the analysis of local main sequence stars observed by HIPPARCOS 93

C. Cacciari
GAIA: the mission and (some of) its scientific applications 97

R. Sordo, A. Vallenari, J. C. Bouret, I. Brott, B. Edvardsson, Y. Frmat, U. Heber, E. Josselin, O. Kochukhov, A. Korn, A. Lanzafame, F. Martins, A. Schweitzer, F. Thvenin and J. Zorec
New high resolution synthetic stellar libraries for the Gaia mission 103

G. Beccari, L. Pulone, F. R. Ferraro, B. Lanzoni, F. Fusi Pecci, R. T. Rood, E. Giallongo, R. Ragazzoni, A. Grazian, A. Baruffolo, C. De Santis, E. Diolaiti, A. Di Paola, J. Farinato, A. Fontana, S. Gallozzi, F. Gasparo, G. Gentile, R. Green, J. Hill, O. Kuhn, N. Menci, F. Pasian, F. Pedichini, R. Smareglia, R. Speziali, V. Testa, D. Thompson, E. Vernet and R. M.Wagner
First results on resolved stellar population in three galactic globular cluster from LBC@LBT imaging 107

S. Molinari and the Hi-GAL Team
Global star formation in the Milky Way with Hi-GAL, the Herschel infrared Galactic Plane Survey 111

P. G. Prada Moroni, P. Barmby, G. Bono, G. Fazio, I. Ferraro, M. Marengo, and R. Buonanno
Mid-IR excess in the globular cluster 47 Tuc 117

E. Dalessandro, B. Lanzoni, F. R. Ferraro, F. Vespe, M. Bellazzini and R. T. Rood
Another non-segregated Blue Straggler population in a Globular Cluster: the case of NGC2419 121

K. Biazzo, L. Pasquini, P. Bonifacio, S. Randich and L. R. Bedin
True solar analogues in the open cluster M67 125

A. Spagna, F. Cossu, M. G. Lattanzi and G. Massone
The nearby strongly reddened open cluster Stock2 129

M. Franchini, C. Morossi, P. Di Marcantonio, M. L. Malagnini, M. Chavez, A. Spagna and M. G. Lattanzi
F-G-K stars from SDSS-DR5 as tracers of Galactic disks and halo 133

G. Giuffrida, L. Troisi, R. Buonanno, L. Pulone, G. Iannicola and M. Castellani
Deblending of Gaia BP/RP spectra: a progress report 135

A. M. Piersimoni, G. Busso and P. M. Marrese
Dense stellar fields observed by the Blue and Red photometers of GAIA 137

A. Moretti, C. Arcidiacono, M. Lombini, G. Piotto, R. Falomo, J. Farinato, R. Ragazzoni, A. Baruffolo and E. Marchetti
MAD@VLT observations in Layer Oriented mode: first results 139

Session V: The life cycle of stars

M. Marconi
Classical cepheids: open problems and perspectives 141

R. Briguglio, G. Tosti, K. G. Strassmeier, H. Bruntt, R. Nesci and L. Sabbatini
The Small IRAIT telescope 147

M. Limongi and A. Chieffi
Presupernova evolution and explosion of massive stars: the role of mass loss during the Wolf-Rayet stage 151

S. Cristallo, O. Straniero, R. Gallino, L. Piersanti, I. Domnguez and M. T. Lederer
Why galaxies care about Asymptotic Giant Branch Stars 157

M. L. Pumo, P. Ventura, F. D'Antona and R. A. Zappal
The "double final fate" of super-AGB stars and its possible consequences for some astrophysical issues 161

E. Cappellaro
Do we still need to search for supernovae? 164

L. Piersanti, I. Domnguez, A. Tornamb and O. Straniero
SNe Ia progenitors: a population synthesis approach 170

G. Lanzafame , V. Costa and G. Belvedere
Effects of compressibility, turbulent viscosity and mass-transfer-rate on accretion discs in close binaries: timescales of outburst events 174

G. Lanzafame, V. Costa and G. Belvedere
How local thermodynamics, viscosity and stellar-mass-ratio influence the whole structure of accretion disc in close binaries: 3D SPH simulations 178

D. Cardini and M. P. Di Mauro
Hints from chromospheric activity to constrain stellar modelling 180

G. Di Rico, M. Dolci, M. Ragni, O. Straniero, A. Valentini, A. Di Cianno, C. Giuliani, C. Bonoli, F. Bortoletto, D. Magrin and L. Corcione
Preparing AMICA for Antarctica: towards robotisation 182

C. Spogli, M. Fiorucci, D. Cappezzali, G. Rocchi and S. Ciprini
Photometric monitoring of dwarf novae 184

Session VI: The violent Universe

L. Stella, S. Dall'Osso and G.L. Israel
The giant flare of 2004 Dec 27 from SGR1806-20 and fundamental physics from magnetars 186

G. L. Israel
Transient phenomena in anomalous X–ray pulsars and soft gamma-ray repeaters 192

L. Angelo Antonelli on behalf of the INAF MAGIC collaboration
From MAGIC to CTA: the INAF participation to Cherenkov Telescopes experiments for Very High Energy Astrophysics 196

G. Ghisellini
Extragalactic jets: a new perspective 201

L. Amati
Gama Ray Burst as cosmolgical probes 207

F. Munz and G. Pizzichini for HETE-2 team
Statistics of HETE-2 Gamma Ray Bursts 211

S. Ciprini on behalf of the GLAST collaboration
Exploring the violent and high-energy frontier of the Universe with GLAST 215

A. F. Grillo
The birth of Cosmic Ray Astronomy? Results from the Pierre Auger Observatory 219

R. Bonino for the Pierre Auger Collaboration
Study of the Ultra High Energy Cosmic Rays arrival directions with the Pierre Auger Observatory 225

S. Ciprini, B. Sbarufatti, J. Kotilainen, R. Decarli, A. Treves, A. Veronesi and R. Falomo
New ESO Very Large Telescope spectroscopy of BL Lacertae objects 229

G. Greco, G. Beskin, S. Bondar, S. Karpov, C. Bartolini, A. Guarnieri, A. Piccioni, E. Molinari, S. Covino, C. Guidorzi and G. Chincarini
TORTORA observations of GRB 080319B 231

Session VII: Solar Interplanetary and Magnetospheric Physics

D. Spadaro
What are the prospects for the study of the Sun and solar–terrestrial relations? 233

R. Bruno, R. D'Amicis, G. Vannaroni, M. B. Cattaneo, G. Pallocchia, P. Baldetti, A. Morbidini, G. Consolini, M. F. Marcucci, B. Bavassano, E. Pietropaolo, V. Carbone, L. Sorriso-Valvo and A. M. Di Lellis
Laboratory activity at INAF-IFSI in the framework of its participation to SWA on-board ESA-Solar Orbiter 239

F. Zuccarello and the EST Team
EST: the European future of solar ground-based observations 243

P. Francia, M. Vellante, U. Villante, M. De Lauretis and A. Piancatelli
Solar-Terrestrial relationships at solar cycle minimum 247

F. Berrilli, M. Velli, L. Roselli, A. Bigazzi and the ADAHELI Team
The ADAHELI (ADvanced Astronomy for HELIophysics) solar mission 251

B. Viticchi, F. Berrilli, J. Snchez Almeida and D. Orozco Surez
MISMA inversion of HINODE SOT/SP data 255

E. Amata, S.P. Savin, G. Consolini, L. Trenchi, D. Ambrosino, R. Treumann and M.F. Marcucci
High kinetic energy density jets in the Earth's magnetosheath: preliminary results 259

M. F. Marcucci
Relevance of Cluster observations near the diffusion region 264

G. Consolini, E. P. Balsamo, M. Candidi, P. De Michelis, M. F. Marcucci and L. Morici
Auroral observations at the Mario Zucchelli Base (Antarctica). Morphological features 268

D. Del Moro, M. Centrone, F. Giorgi and S. Criscuoli
Enhancing the spatial resolution of IBIS spectrograms via Multi-Frame Blind Deconvolution 270

D. Ambrosino, E. Amata, M. F. Marcucci and I. Coco
Evolution of the magnetopause X line during variable IMF orientation 272

R. D'Amicis, R. Bruno and B. Bavassano
Geomagnetic activity driven by solar wind turbulence 274

M. P. Di Mauro
HELAS: the European Helio- and Asteroseismology Network 276

S.L. Guglielmino, P. Romano, F. Zuccarello and L. R. Bellot Rubio
Observations of small-scale flux evolution with HINODE 278

R. D'Amicis, R. Bruno, G. Pallocchia, B. Bavassano, E. Pietropaolo, V. Carbone, L. Sorriso-Valvo and R. Marino
Observing MHD turbulence in the solar wind 280

V. Penza and D. Del Moro
A granulation model: possible effects of contrast variations on the solar irradiance along the cycle 282

C. Taricco, N. Bhandari, P. Colombetti, A. Romero, N. Verma and G. Vivaldo
Reconstruction of solar activity variations in the past by measurement of cosmogenic radioisotopes in meteorites 284

L. Trenchi, M. F. Marcucci, G. Pallocchia, G. Consolini, M. B. Cattaneo, A. Di Lellis, H. Rme, L. Kistler, C. M. Carr and J. B. Cao
Magnetic reconnection at the dayside magnetopause with Double Star Tc1 data 287

S. Giordano, F. Berrilli and D. Del Moro
The Void Probability Function in MDI magnetograms 289

R. D'Amicis, R. Bruno, B. Bavassano, E. Pietropaolo and U. Villante
Waiting time distributions of Bs and AE extreme events 291

M. Stangalini, D. Del Moro and F. Berrilli
Wavefront sensing for Themis: a case study for next generation solar telescopes like EST 293

Session VIII: The Solar System

M. C. De Sanctis, A. Coradini, E. Ammannito, M. T. Capria and S. Fonte
VIR, the imaging spectrometer for the asteroid belt exploration 295

G. B. Valsecchi
Recent advances in Solar System dynamics 301

V. Costa, V. Pirronello, G. Belvedere, D. Molteni and G. Lanzafame
2D SPH simulations of planet-disc interactions 306

V. Costa, V. Pirronello, G. Belvedere, D. Molteni and G. Lanzafame
Simulations of asteroid-type bodies within an accretion disc: effects on tilted orbits 310

Session IX: The Search for Extraterrestrial Planets and Life

R. Gratton, S. Desidera and R. Claudi
Extrasolar planet observational studies: the Italian contribution 312

A. Sozzetti, D. W. Latham, G. Torres, B. W. Carney, J. B. Laird, R. P. Stefanik, A. P. Boss, D. Charbonneau , F. T. O'Donovan, M. J. Holman and J. N. Winn
Probing Structural and Evolutionary Properties of Exoplanets 318

Session X: Italian national facilities

E. Oliva
The scientific use and productivity of the Telescopio Nazionale Galileo (TNG) 322
