AGB stars: a key ingredient in the understanding and interpretation of stellar populations

European Week of Astronomy and Space Science

La Laguna, Tenerife, June 22-26, 2015

editors: P. Ventura, D. A. García–Hernández, M. Groenewegen, J. Th. van Loon

TABLE OF CONTENTS

Index 225

Foreword 227

A.I. Karakas
The role of asymptotic giant branch stars in galactic chemical evolution 229

A. Yagüe, D.A. García-Hernández, P. Ventura, M. Lugaro
S-process nucleosynthesis in AGB models with the FST prescription for convection 237

F. D'Antona and P. Ventura
Hot CNO and p-capture nucleosynthesis in intermediate mass AGB stars 243

L. Mattsson
Winds of AGB stars: the two roles of atmospheric dust 249

F. Dell'Agli, D.A. García-Hernández, P. Ventura, R. Schneider, M. Di Criscienzo, and C. Rossi
Dust from AGBs: understanding the Spitzer observations of evolved stars in the Large Magellanic Cloud 255

G. Rau, C. Paladini, J. Hron, B. Aringer, M.A.T. Groenewegen, and W. Nowotny
Modelling a set of C-rich AGB stars: the cases of RU Vir and R Lep 260

O. Zamora
Circumstellar effects on the chemical abundances in AGB stars 265

M.L. Boyer
recent observations of AGB stars in nearby galaxies and future perspectives 269

A. Javadi, J. Th. van Loon, and H. Khosroshahi
The role of AGB stars feedback in sustaining galaxy evolution 278

A. Mucciarelli
The chemical composition of AGB stars in globular clusters 284

A.F. Marino
Chemical abundances of multiple stellar populations in globular clusters: the role of asymptotic giant branch stars 289

J.J. Díaz-Luis, D.A. García-Hernández, N. Kameswara Rao, A. Manchado, and F. Cataldo
First evidence of the possible detection of diffuse circumstellar bands in AGB descendants 295

S. Madonna, J. García-Rojas, V. Luridiana, N.C. Sterling, and C. Morisset
A window on the efficiency of the s-process in AGB stars: chemical abundances of n-capture elements in the planetary nebula NGC 3918 299

A.P. Milone
Multiple populations in Globular Clusters from multi-wavelength HST photometry 303

C. Rossi, V.F. Polcaro, O. Maryeva, R. Gualandi, R. Nesci, A. Chieffi, and R.F. Viotti
Past, Present and Future of the luminous variable Romano's Star in M33 307

R. Smolec
Dynamical phenomena in the pulsation of type II Cepheids models 311

G. Tautvaisiene, R. Smiljanic, V. Bagdonas, A. Drazdauskas, and Š. Mikolaitis
The role of asymptotic giant branch stars in the chemical evolution of the Galaxy 315
