Vol.89 n.4 2018

The Scientific Legacy of Guido Horn d'Arturo

Catania, November 9-10 2018

editors: R. Spiga, F. Bonoli, G. Pareschi, G. Trincheri

TABLE OF CONTENTS

Index 445

Foreword 446

F. Bonoli
Guido Horn d'Arturo and the first multi-mirror telescopes: 1932-1952 448

R. Ragazzoni
The fine and transformational optics of Guido Horn d'Arturo 468

F. Fernandez-Barral and F. Ferrini
Cherenkov Telescope Array: 120 telescopes and 6500 mirror segments to explore the very high-energy Universe 473

S. Scuderi
The ASTRI project 484

O. Catalano
Cherenkov light for gamma astronomy and not only 492

L. Zarantonello
The eventful life of Guido Horn d'Arturo in a comic book 500

S. Sinicropi
Guido Horn d'Arturo, the world, the passions and the interests of a contemporary humanist 512

C. Quareni
Guido Horn d'arturo, the Jewish roots of an Italian astronomer 522

M. Gargano
The Astri of Horn: the scientific legacy of astronomer who invented the future 529

G. Pareschi
From the Horn d'Arturo segmented telescope to the ASTRI-HORN end-to-end system: cutting-edge technologies and industrial involvement in astronomical instrumentation 535

R. Spiga(curated by), G. Giobbi(translated by)
Guido Horn d'Arturo: selected papers 540
